Section I. Physical Processes and X-ray Production

First centenary of Röntgen's discovery of X-rays
V. Valkovic 1
Relative L-shell X-ray emission rates in PIXE
S. Fazinić 9
M-shell X-ray production cross sections of Tb, Ho, Tm and Lu for protons of energy 2–6 MeV
F. Shokouhi, S. Fazinić, I. Bogdanović, M. Jakšić, V. Valković and H. Afarideh 15
L-shell X-ray production cross sections and alignment by proton impact
V.P. Petukhov, E.A. Romanovsky and H. Kerkow 19
Energy calculation of K^1L^1 multiply ionized $K\beta$ satellite spectra emitted from Al, Al_2O_3, Si and SiO_2
T. Yamamoto, M. Mochizuki, T. Suzuki and M. Uda 23
Interference peak intensities due to the Raman scattering in PIXE induced XRF
T. Kotani, S. Nagashima, M. Kato, K. Morito and M. Uda 28
Estimation of $FK\alpha K^1L^1$ satellite intensity based on the MO scheme
M. Mochizuki, T. Yamamoto, S. Nagashima and M. Uda 31
Chemical effects in Cr containing samples measured by the K_β/K_α intensity ratio and the K_β energy shift
F. Folkmann 39
X-ray emission from chemically bound atoms
C. Günther, E. Hartmann, C. Lauterbach and J. Hormes 42
L-subshell ionization of Eu, Gd and W by 1.6–5.2 MeV protons
I. Bogdanović, S. Fazinić, M. Jaksić, I. Orlić and V. Valković 47
M-shell X-ray production by C, N and O ions
T. Czyżewski, L. Głowacka, M. Jaskóła, J. Braziewicz, M. Pajek, J. Semaniak, M. Haller, R. Karschnick, W. Kretschmer, A.P. Kobzev and D. Trautmann 52
On the enhanced PIXE yields from thick iron fluoride targets
Z. Szökefalvi-Nagy, I. Demeter, K. Hollós-Nagy and I. Kovács 59

Section II. Experimental Procedures

Procedures of target preparation to improve PIXE efficiency in environmental research
G. Ghermandi, R. Cecchi and P. Laj 63
Si(Li) detector response and PIXE spectrum fitting
J.L. Campbell 71

0168-583X/96/$15.00 © 1996 Elsevier Science B.V. All rights reserved

Methodological studies of PIXE on biological and environmental science
Sha Yin, Gu Yingmei, Liu Guodong, Wang Anpu, Zhang Peiqun, Zhu Jieqing, Shi Jian, Yang Shulan, Liu Pingsheng and Li Xiaolin 79

Total reflection PIXE (TPIXE) and RBS for surface and trace element analysis
J.A. van Kan and R.D. Vis 85

The LNL proton microprobe: original technical solutions and new developments
P. Boccaccio, D. Bollini, D. Ceccato, G.P. Egeni, P. Rossi, V. Rudello and M. Viviani 94

Personal computer aided data handling and analysis for PIXE
K. Sera and S. Futatsugawa 99

High resolution PIXE instrumentation survey. Part III
V.P. Petukhov, I. Török and M. Terasawa 105

The new PIXE setup at the Institute of Nuclear Physics in Kraków
E. Rokita, A. Wróbel, W.M. Kwiatek and E. Dutkiewicz 109

Improvement on experimental procedure of various samples in PIXE analysis
S. Futatsugawa, S. Hatakeyama, Y. Saitou and K. Sera 113

Influence of energy straggling on quantitative PIXE analysis
J.L. Ruvalcaba and J. Miranda 121

An improved experimental setup for the simulations PIXE analysis of heavy and light elements with a 3 MeV proton external beam
T. Calligaro, J.D. MacArthur and J. Salomon 125

Experimental X-ray peak-shape determination for a Si(Li) detector
L.C. Alves, A.P. Jesus and M.A. Reis 129

Matrix effects correction for quantitative TTPIXE analysis
M.A. Reis, L.C. Alves and A.P. Jesus 134

RBS control of the proton fluence in external PIXE analysis using a He atmosphere
B. Hietel, N. Menzel and K. Wittmaack 139

High resolution PIXE set-up
M.G. Budnar 144

The new ATOMKI scanning proton microprobe
I. Rajta, I. Borbély-Kiss, Gy. Mórik, L. Bartha, E. Koltay and Á.Z. Kiss 148

Overlap corrected on-line PIXE imaging using the proton microprobe
C.G. Ryan, E. van Achterbergh, D.N. Jamieson and C.L. Churms 154

Low current charge normalization with scintillators
A.J.M. Plompen, F. Munnik and U. Wätjen 161

PIXE setup for liquid sample analysis
J. Král, J. Voltr and Z. Nejedlý 167

The "Q factor" method: quantitative microPIXE analysis using RBS normalisation
G.W. Grime 170

Isobar suppression in accelerator mass spectrometry by the detection of characteristic X-rays
A. Wiebert, P. Persson, M. Elfman, B. Erlandsson, R. Hellborg, P. Kristiansson, K. Stenström and G. Skog 175

Accurate evaluation of μ-PIXE and μ-XRF spectral data through iterative least squares fitting
K. Janssens, B. Vekemans, F. Adams, P. van Espen and P. Mutsaers 179

Use of PIXE measurements performed at different proton energies to calculate matrix correction for infinitely thick targets (TTPIXE) within the framework of the α parameter method
G. Weber, G. Robaye, J.M. Delbrouck, I. Roelandts and P. Aloupogiannis 186

Structural and chemical modifications of microsamples induced during PIXE analysis
M. Maetz, P. Arndt, A. Greshake, E.K. Jessberger, W. Klöck and K. Traxel 192

Device-independent and standardless quantitative statement of elemental concentrations in non-thin targets by PIXE
V. Potocek and N. Toulhoat 197

Study of sample charging effects on satellite spectra of Ca K α by means of high-resolution PIXE
H. Hamanaka, K.-i. Hasegawa and K. Maeda 203
Strong X-ray emission due to electrification
J. Kawai, K. Maeda, N. Sakauchi and I. Konishi 206
Algorithm for fitting XRF, SEM and PIXE X-ray spectra backgrounds
M.A. Kneen and H.J. Annegarn 209
Feasibility study of a portable PIXE system using a ^{210}Po alpha source
G. Pappalardo, J. de Sanoit, A. Musumarra, G. Calvi and C. Marchetta 214

Section III. Combined Use of PIXE with Other Analytical Techniques

Elemental analysis by PIXE and other IBA techniques and their application to source fingerprinting of atmospheric fine particle pollution
D.D. Cohen, G.M. Bailey and R. Kondepudi 218
PIXE and ionoluminescence – A synergetic analytical combination
K.G. Malmqvist, M. Elfman, G. Remond and C. Yang 227
Ion beam analysis of metalloproteins
Z. Szökefalvi-Nagy 234
Determination of toxic and non-toxic hair trace elements in tobacco smokers using PIXE and NAA techniques
A.A. Hosseini, A. Amirabadi, H. Afarideh, S.M. Hadji-Saeid and A.H. Behrozi 239
Precise analysis of PIXE induced XRF spectra with the aid of the Raman scattering
S. Nagashima, T. Kotani, M. Kato, K. Morito, H. Matsui and M. Uda 243
Studying the spatial variability of Cr in agricultural field using both particle induced X-ray emission (PIXE) and instrumental neutron activation analysis (INAA) technique
P.E. Cruvinel, S. Crestana, P. Artaxo, J.V. Martins and M.J.A. Armelin 247
Coupling PIXE and SEM/EDAX for characterizing atmospheric aerosols in ice-cores
P. Laj, G. Ghermandi, R. Cecchi and D. Ceccato 252
PIGE-PIXE analysis of human milk
S.O. Olabanji, M.C. Buoso, D. Ceccato, A.M.I. Haque, R. Cherubini and G. Moschini 258
Applications of PIXE, PIGE, SEM and EDAX techniques to the study of geological samples
S.O. Olabanji, A.M.I. Haque, S. Zandolin, R.T. Ajayi, M.C. Buoso, D. Ceccato, R. Cherubini, D. Zafiropoulos and G. Moschini 262
A device for the direct coupling of high-resolution separation techniques with PIXE
J. Vogt, T. Butz, C. Vogt, H. Wittrisch and G. Werner 266

Section IV. Applications of PIXE to Biomedical Samples

Biomedical studies by PIXE
H. Afarideh, A. Amirabadi, S.M. Hadji-Saeid, N. Mansourian, K. Kaviani and E. Zibafar 270
Preliminary experimental results on mapping of the elemental distribution of the organic tissues surrounding titanium-alloy implants
A.M. Ektessabi, T. Otsuka, Y. Tsuboi, Y. Horino, Y. Mokuno, K. Fujii, T. Albrektsson, L. Sennerby and C. Johansson. 278
Investigation of trace elements in cancer kidney tissues by SRIXE and PIXE
W.M. Kwiatek, T. Drewniak, M. Lekka and A. Wajdowicz 284
PIXE and micro-PIXE studies of ion release around endosseous implants in animals
G.P. Egeni, M. Jaksic, G. Moschini, P. Passi, A. Piattelli, P. Rossi, V. Rudello and L. Tauro 289
Apoptosis and the trace elements
S. Harada, T. Yanagisawa, K. Sera, P. Ling, S. Futatsugawa and S. Hatakeyama 294
Cross-linking of DOPA-proteins in the eggshell of *Bdelloura candida*, a marine worm: a PIXE study
C.P. Swann, J.H. Waite and L.G. Huggins 301

Application of PIXE to study the zinc concentration on erythrocyte membrane and the effect of zinc deficiency
H. Yao, J. Huang, J. Zhang, F. Qian and P. Huang 305
Heterogeneity measurement of trace elements distribution in sheep liver usingthe PIXE method
H. Peyrovan and A. Amirabadi 309
A PIXE study of vitrification of carnation in vitro culture
H.Y. Yao, E.K. Lin, C.W. Wang, Y.C. Yu, C.H. Chang, Y.C. Yang and C.Y. Chang 312
Dyspepsia treatment with Al compounds widely used in clinical practice – an animal model approach
T. Pinheiro, J. Canena, J. Reis, A.M. Santos, A.S. Pinto, M.G. Quina, M.A. Reis and L.C. Alves . . . 318
An atomic basis of cancer (VI) – PIXE comparison of tumor localizers
C.-C. Wei, Y. Tominaga and C.-W. Wang 323
Elemental composition of different types of wood
M. Esch, D. Hofmann, G. Krebs, C. Thierfelder, R. Wünsch, R. Maier, M. Kuzel, M. Schosnig and K.O. Groeneveld 328
PIXE analysis of *fusarium culmorum* fungus treated with chemical agents
J. Koay, R.W. Osborn, G.W. Grime and S. Rees 332
Elemental analysis of lichens from the intermountain western USA using PIXE
R.N. Williams, R.C. Casellas, N.F. Mangelson, L.B. Rees, L.L. St. Clair, G.B. Schaaltje and K.D. Swalberg 336
An attempt to analyze fish otoliths by in-air PIXE
N. Arai, W. Sakamoto and K. Maeda. 341
In vivo measurement of titanium release by PIXE
Y. Tsuboi, A.M. Ektessabi, L. Sennerby, T. Albrektsson, T. Otsuka, T. Iizuka, C. Johansson and A. Wennerberg. 345
Selenium glutathione peroxidase activities and thyroid functions in human individuals
G. Bellisola, M. Calza Contin, D. Ceccato, G. Cinque, G. Francia, S. Galassini, N.Q. Liu, C. Lo Cascio, G. Moschini and P.L. Sussi 350
Se status in normal and pathological human individuals before and after Se supplementation
G. Bellisola, G. Cinque, S. Galassini, G.C. Guidi, N.Q. Liu and G. Moschini 354
Study on the changes of metal elemental contents in whole blood and bone during fracture healing
Sha Yin, Liu Guodong, Lan Wenzheng, Liu Pingsheng, Zhang Peiqun, Lin Han and Wen Xiaoheng. . 358
Microprobe PIXE analysis of aluminium in the brains of patients with Alzheimer's disease
S. Yumoto, Y. Horino, Y. Mokuno, S. Kakimi and K. Fujii 362
Positional distribution of elements in biological tissue
N. Liu, H. Shao, D. Ma, Y. Den, P. Liu, Q. Xu, J. Zhao, A.M.I. Haque, M. Viviani and G. Moschini . 368
PIXE and TR-XRF measurements of titanium levels in rabbit organs after endosseous implants insertion
G. Bernasconi, M.C. Buoso, D. Ceccato, G. Cinque, M. Dargie, S. Galassini, G. Moschini, P. Passi, V. Valkovic, S. Varotto and A. Zadro 372

Section V. Applications of PIXE to Analysis of Environmental Samples

A multiannual experiment on tropospheric aerosols at Terranova Bay (Antarctica): role of PIXE analysis and related techniques
P. Mittner, D. Ceccato, S. Del Maschio, E. Schiavuta, F. Chiminello, P. Buso, S. Agostini, V. Prodi, M. Mazza and F. Belardinelli 375
PIXE methods and sea–air exchange of materials
E. Schiavuta 381
The use of PIXE and complementary ion beam analytical techniques for studies of atmospheric aerosols
E. Swietlicki, B.G. Martinsson and P. Kristiansson 385
Reference materials in the context of calibration and quality control of PIXE analysis: The case of aerosols analysis
U. Wätjen and H. Cavé 395

Climate forcing by anthropogenic aerosols: the role for PIXE
T.A. Cahill 402
Geochemical processes in Venice Lagoon by PIXE technique: an overview
R. Cecchi, G. Ghermandi and R. Zonta 407
A combined experimental–modelling method for the detection and analysis of pollution in coastal zones
N. Limić and V. Valković 415
"Global Change" related and other atmospheric aerosol research at the university of Gent, and the role of PIXE therein
W. Maenhaut 419
The effectiveness of PIXE approach to the study of urban and regional atmospheric pollution in Northern Italy
G.M. Braga Marcazzan 429
Studies of atmospheric aerosols in large urban areas using PIXE: an overview
J. Miranda 439
Elemental composition of urban aerosol collected in Debrecen, Hungary
I. Borbély-Kiss, E. Koltay and G. Szabó 445
Comparative analysis of aerosols elemental distribution in some Romanian regions
S. Amemiya, T. Masuda, L. Popa-Simil and L. Mateescu 450
Upgrading of the PIXE system at ININ (Mexico) and report on elemental composition of atmospheric aerosols from 1990 in the ZMCM
F. Aldape, J. Flores M, R.V. Díaz and D. Crumpton 459
Mass size distributions for atmospheric trace elements at the Zeppelin background station in Ny Ålesund, Spitsbergen
V. Havránek, W. Maenhaut, G. Ducastel and J.E. Hanssen 465
Characterization of atmospheric aerosols separated by particle size and water solubility using PIXE analysis
M. Kasahara, J.H. Park and K. Yamamoto 471
Size-fractionated aerosol composition at Gent, Belgium. Results from a one-year study
W. Maenhaut, F. François, J. Cafmeyer and O. Okunade 476
A new cascade impactor for aerosol sampling with subsequent PIXE analysis
W. Maenhaut, R. Hillamo, T. Mäkelä, J.-L. Jaffrezo, M.H. Bergin and C.I. Davidson 482
PIXE and XRF analysis of marine sediments
O. Valković and I. Bogdanović 488
Main atmospheric heavy metal sources in Portugal by biomonitor analysis
M.A. Reis, L.C. Alves, H.T. Wolterbeek, T. Verburg, M.C. Freitas and A. Gouveia 493
Dual-energy technique for rapid, high-sensitivity PIXE analysis of aerosol samples covering elements with atomic numbers down to $Z = 13$
B. Hietel, F. Schulz, N. Menzel, J. Tschiersch, B. Busch and K. Wittmaack 498
PIXE analysis of atmospheric aerosols from a simultaneous three site sampling during the autumn of 1993 in Mexico City
F. Aldape, J. Flores M, R. García G and J.W. Nelson 502
Anthropogenic contamination of an estuarine system evaluated by PIXE
J.E. Martín, M.A. Respaldiza, R. García-Tenorio, J.P. Bolívar, J. Gómez-Camacho and M.F. da Silva. 506
Chemical speciation of aerosol samples by ion beam thermography
B. Mentes, M. Elfman and B.G. Martinsson 511
Source characterisation of the Central European atmospheric aerosol using multivariate statistical methods
E. Swietlicki and R. Krejci 519
Trace element analysis of precipitation samples by preconcentration and PIXE measurement
J. Tschiersch, B. Hietel, B. Maier, F. Schulz and F. Trautner 526
Long term aerosol measurements
K. Kemp 530

Study of seasonal variations of trace-element concentrations within tree rings by thick-target PIXE analyses
J. Harju, J-O. Lill, K-E. Saarela, S-J. Heselius, F.J. Hernberg and A. Lindroos 536
Chemical states of sulfate at Shenandoah National Park during summer, 1991
T.A. Cahill, P.H. Wakabayashi and T.A. James 542
Airborne streaker sampling for PIXE analysis
H.J. Annegarn, M. Flanz, T. Kenntner, M.A. Kneen, G. Helas and S.J. Piketh 548
Correlation of acid rain with the distributions of acid and alkaline elements in aerosols
Sha Yin, Wang Anpu, Yang Shulan and Liu Pingsheng 551

Section VI. Applications of PIXE to Characterization of Materials

Study of physical and chemical inhomogeneities in semiconducting and insulating materials by a combined use of micro-PIXE and micro-IBIC
C. Manfredotti, F. Fizzotti, E. Vittone, M. Boero, P. Polesello, S. Galassini, M. Jaksic, S. Fazinic and I. Bogdanovic. 555
The application of PIXE to the mapping of contaminants deposited on a monolithic automotive catalytic converter
D.E. Angove, N.W. Cant, G.M. Bailey and D.D. Cohen 563
A guiding principle to select PIXE or PIXE-induced XRF for steel analysis
K. Morito, S. Nagashima, M. Kato, T. Kotani and M. Uda 569
PIXE analysis of heavy elements in silicon using MeV heavy ion beams
Y. Mokuno, Y. Horino, A. Kinomura, A. Chayahara, N. Tsubouchi and K. Fuji 573
Analysis of Ag–Co thin film alloys using PIXE and RBS
R. Šandrik and G.W. Grime 576
Application of MeV carbon ions for PIXE measurements in silicon and high-T_c superconductors
T. Tadić, D. Dujmić, M. Jakšić, V. Valković and C. Manfredotti 580
PIXE analysis of antinodularizing elements Al, Pb and Bi in nodular cast iron
S.L. Feng, M.Q. Ren and M. Zhong 584

Section VII. Applications of PIXE to Geological and Mineralogical Samples

Study of volcanic sediments by microbeam-PIXE technique
N.I. Khandaker, M. Ahmed and M.A. Garwan 587
Micro-PIXE studies of Sr zoning in Arctic charr otoliths: migratory behaviour and stock discrimination
N.M. Halden, J.A. Babaluk, A.H. Kristofferson, J.L. Campbell, W.J. Teesdale, J.A. Maxwell and J.D. Reist 592
Chemical composition and paramagnetism of vein quartz from the Tasmania gold mine, Beaconsfield, northern Tasmania
D.W. Russell, G.M. Bailey, J.C. van Moort and D.D. Cohen 598
Diamond exploration and mantle structure imaging using PIXE microanalysis
C.G. Ryan, W.L. Griffin and T.T. Win. 601
The analysis of rare-earth bearing minerals using K and L X-ray spectra
C.G. Choi, G. Remond and D.B. Isabelle 606
Study of microspherules in the Permian–Triassic bedded chert of the Sasayama section, Southwest Japan by PIXE analysis
S. Miono, Zheng Chengzhi and Y. Nakayama 612
Elemental analyses of marine skeletons
C. Solis, A. Oliver and L. Rodríguez-Fernández 617
PIXE analysis of the desorption of elements from bog mud
Y. Matsuda, T. Ishiyama and F. Nishiyama 621
Distribution of rare metals in kuroko-type ore: a PIXEPROBE study
S. Murao, S.H. Sie and G.F. Suter 627

Trace element distribution in native gold
S.H. Sie, S. Murao and G.F. Suter 633
"Fingerprint PIXE method" in the identification of the quarries of some lavic material used as building stone from the S.M. Maddalena Church in Buccheri-Sicily
P. Atzori, P. Baeri, A. D'Innocenzo, G. Pappalardo, L. Pappalardo and R. Reitano 639

Section VIII. Applications to Archaeology, Art and Other Man-made Aspects

Recent applications to the study of ancient inks with the Florence external-PIXE facility
F. Lucarelli and P.A. Mandò 644
Application of PIXE to the study of Renaissance style enamelled gold jewelry
M. Weldon, J. Carlson, S. Reedy and C.P. Swann 653
Application of the external PIXE analysis to ancient Egyptian objects
S. Nagashima, M. Kato, T. Kotani, K. Morito, M. Miyazawa, J. Kondo, S. Yoshimura, Y. Sasa and M. Uda 658
PIXE analysis of ancient Greek copper coins minted in Epirus, Illyria, Macedonia and Thessaly
N. Kallithrakas-Kontos, A.A. Katsanos, C. Potiriadis, M. Oeconomidou and J. Touratsoglou 662
Multielement analysis on bone structures of medieval human femur
D. Grambole, F. Herrmann and B. Herrmann 667
PIXE elemental analysis of South American mummy hair
A.Y. Du, N.F. Mangelson, L.B. Rees and R.T. Matheny 673
Search for the origin of iron manufacturing at Kansai area in Japan by PIXE analysis
S. Miono, Zheng Chengzhi, Y. Nakayama, S. Manabe and K. Ohmichi 677
Characterization of ligurian pottery by PIXE analysis
S. Pio, P. Prati, A. Zucchiatti, F. Lucarelli, P.A. Mandò and C. Varaldo 681
PIXE analysis of jewels from an Achaemenid tomb (IVth century BC)
G. Querré, A. Bouquillon, T. Calligaro, M. Dubus and J. Salomon 686
Corrosion phenomena in electron, proton and synchrotron X-ray microprobe analysis of Roman glass from Qumran, Jordan
K. Janssens, A. Aerts, L. Vincze, F. Adams, C. Yang, R. Utui, K. Malmqvist, K.W. Jones, M. Radtke, S. Garbe, F. Lechtenberg, A. Knöchel and H. Wouters 690

Section IX. Industrial Application

Macroscopic and microscopic approach to the study of enrichment phenomena in the electrostatic precipitation of coal fly ash particles
E. Cereda, G.M. Braga Marcazzan, G.W. Grime and F. Mattachini 696

Section X. Conference Overview

Conference overview
J.L. Campbell 701

Author index 705
